Salt Lake City, Utah 84116-3156

Dear Mr. Morgan,

The Milford Valley Distribution System held their anual meeting on February 9, 1995.

Progress has been made in measuring the water pumped in the Milford Area by installing meters and pitot tube readings. Record keeping is good but there is room for improvement.

The anual report shows that there is water being over pumped in the valley by a number of water users. The whole valley was over pumped by 2400 acre feet.

We would like to request at this time that you send each water user in the Milford Valley a letter stating that the valley has been over pumped and to conserve water and stay in their alocated water right.

In the past 3 years certain things have been discussed and a repeated issue is the Beaver Valley pumping district. Since Milford and Beaver are in the same county and drainage system we want water meters or a device to measure water usage on wells pumped. We would also want Beaver Valley water users to hire a Water Commisioners to read their meters.

Sincerely,

Board of Directors
